Office Action Summary

Application No.

10/642,493

Applicant(s)

KATSUMATA, YOSHIHIRO

Examiner

John m. Cooney

Art Unit

1711

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3,4,13 and 14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,3,4,13 and 14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☒ Certified copies of the priority documents have been received in Application No. 10/227,269.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Applicant's arguments filed 6-13-05 have been fully considered but they are not persuasive.

All objections and all rejections under 35 USC 112 are withdrawn in light of applicants' amendments and remarks.

The following rejection under 35 USC 103 is maintained as set forth below:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,4,13, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scherzer et al. (6,031,013), alone, or in view of Fujita et al.(6,303,669).

Scherzer et al. discloses preparations of polyurethane foams from high molecular weight polyols, isocyanates, foaming agents inclusive of water in amounts prescribed by applicants' claims, chain extenders and/or crosslinkers reading on applicants' claimed low molecular weight polyol and the crosslinkers of applicants' claims, silicone-polyether stabilizers, and catalysts, wherein the reactants are combined in amounts and manners

Art Unit: 1711

which meet the urethane/urea criteria of applicants' claims (see column 1 line 47- column 10 line 13, as well as, the entire document).

Scherzer et al. differs from applicants' claims in that urea modification to the polymer through inclusion of urea groups is not particularly required. However, the reference is clear in its recitation that urea group content may be incorporated into the polymers through inclusion of urea groups in the isocyanate (see column 2 lines 53-56). Accordingly, it would have been obvious for one having ordinary skill in the art to have employed isocyanates containing urea groups, as disclosed by Scherzer et al. in the making of the preparations of Scherzer et al. for the purpose of imparting greater crystallinity to the structures realized in order to arrive at the products of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Scherzer et al. further differs from the claims in that the flexible polyurethanes prepared are not particularly employed as edge members of diaphragms of speakers. However, Fujita et al. discloses that it is well known to employ flexible polyurethane foams as edge members of diaphragms of speakers for the purpose of utilizing the beneficial properties of the respective foam while serving the function of operating as a speaker edge material. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed the flexible foam materials of Scherzer et al. in the function of the speaker edge material in the preparations of Fujita et al. for the purpose of imparting their flexibility and lightfastness effect in order to arrive at the

products of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Applicants' arguments have been considered with regards to the above rejection, but rejection is maintained to be proper for the reasons as set forth above.

Scherzer et al. is maintained to teach allowance for the inclusion of urea group contents in their preparations, and rejection on this issue is maintained to be proper. Applicants have not established criticality associated with and commensurate in scope with the range of relative urea content values recited in the claims.

Scherzer et al. and Fujita et al. are maintained to be properly combined as set forth above, and it is maintained that success would be reasonably expected upon making the combinations as set forth in the rejection above. Applicants' have not demonstrated new or unexpected results associated with the employment of the materials, as defined by the claims, as edge members of the diaphragms of speakers to a sufficient degree that the rejection, as set forth above, is overcome.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

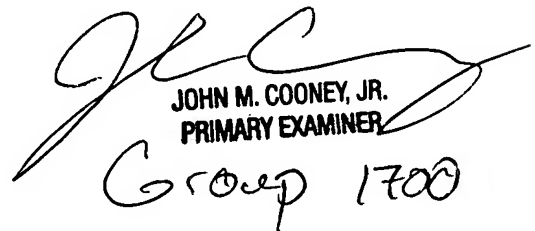

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Cooney whose telephone number is 571-272-1070. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
